

MITRE / FLUX NOTES **SELECTED CONCEPTS** v14.10

EDWIN CHOI, DANIEL REEVES, JUHAN SONIN, 2.AUG.2018

The following concepts explore clinical note functionality in terms of differentiating between content types.

I CLINICAL NOTE HIGHLIGHTING

Toggle Source Menu (Selective)

Toggles a menu that both explains and selects displayed styling

Pros:

User can continue to edit note.

User can control which styling to display

Fully customizable

Makes fewest assumptions of clinician's preferred workflow

Key and menu can be hidden

Cons:

Key is distracting and takes up space

Styling is distracting while editing

Fully customizable...

Dr. Jraker299 referred ms. Debra24 Hernandez98Aj due to pain in left breast. Dr. Jraker299 is ms. Debra24 Hernandez98Aj's primary care physician for 12 years.

Summary

Ms. Debra24 Hernandez98Aj is a 51-year-old menopausal non hispanic or latino woman with invasive ductal carcinoma of the breast, diagnosed on 13 January 2012. Her most recent status, recorded on 15 May 2017, is of worsening, disease progression based on pathology, imaging, and symptoms.

She underwent a lumpectomy. She underwent a sentinel lymph node biopsy on 20 September 2012 which revealed infiltrating poorly differentiated ductal carcinoma, stage IV, estrogen receptor 0, etc.

diagnostic mammogram on 4 October 2013 revealed a 2 cm mass in the right breast at 7 o'clock and an

4 Assessment

Although her disease status is stable as of 1/30/2018, recommending to half
after 5 cycles due to toxicity grade 3 myalgia and toxicity grade 3
peripheral motor neuropathy attributed to paclitaxel.

Patient's staging is IIIA based on T0, N2, and has M0. Given the current data, I
determine disease status

The patient is deceased or not deceased. A Port-A-Cath was replaced today.
She will start induction chemotherapy with trastuzumab due to low volume of
metastatic disease, beginning on October 17, 2017. A section of @ retrieved data
from the patient record.

The patient is exhibiting toxicity The patient is also exhibiting toxicity nausea.
The patient's receptors are as follows, HER2 is positive. ER is positive. PR is . A
section of @ retrieved data from the patient record. The patient is interested in
clinical trial enrollment. Enrolled in PATINA.

Ask patient about how her brother is doing.
