Assessment

Although her #disease status is #stable #as of #1/30/2018, recommending to half after 5 cycles due to #toxicity #grade 3 #myalgia and #toxicity #grade 3 #peripheral motor neuropathy attributed to paclitaxel.

Patient's staging is IIIA based on TO, N2, and has MO. Given the current data, I determine the patient is stable.

A Port-A-Cath was replaced today. She will start induction chemotherapy with trastuzumab due to low volume of metastatic disease, beginning on October 17, 2017. A section of @ retrieved data from the patient record.

The patient is exhibiting fatigue. The patient is also exhibiting "toxicity nausea." The patient's receptors are as follows, #HER2 is positive. #ER is positive. A section of @ retrieved data from the patient record. The patient is interested in clinical trial enrollment. Enrolled in PATINA.

Her brother is doing great!.
